

CAREERS

There's a good chance you're already using Ciena technology. Why not be part of it?

WE ARE CIENA

For more than 25 years, Ciena has been the global leader in networking strategy. Our technology is part of the critical infrastructure running within the world's most advanced companies.

We develop the latest products and technology that form the foundation of many of the world's largest networks. We are a major American telecommunications networking equipment and software services supplier with 8000+ employees.

Our team in Alpharetta, GA is looking for talent:

- Working towards completion of a Bachelors, Masters or PhD in ECE
- Preferred skills: Signal processing, Telecommunications/Optical Communications, Hardware, FPGA, Embedded Software

We are the makers of the record-breaking 1.6 Tb/s per wavelength WaveLogic 6 Extreme (WL6e) modem, which

- Uses advanced signal processing
- Provides 800G connectivity across virtually all network links
- Doubles wavelength capacity
- Reduces space & power per bit by 50% over WL5e
- Improves spectral efficiency by 15% over WL5e

Celebrating WaveLogic 6 success
